

SMART

CHARGING SOLUTION

OCPP

Bidirectional communication with the chargers by OCPP protocol

Multiple recharging points management

Managing authorizations of charge for users

Scheduled optimization of recharge

Universal Compatibility

OBJECTIVES

Intelligent balancing of charge

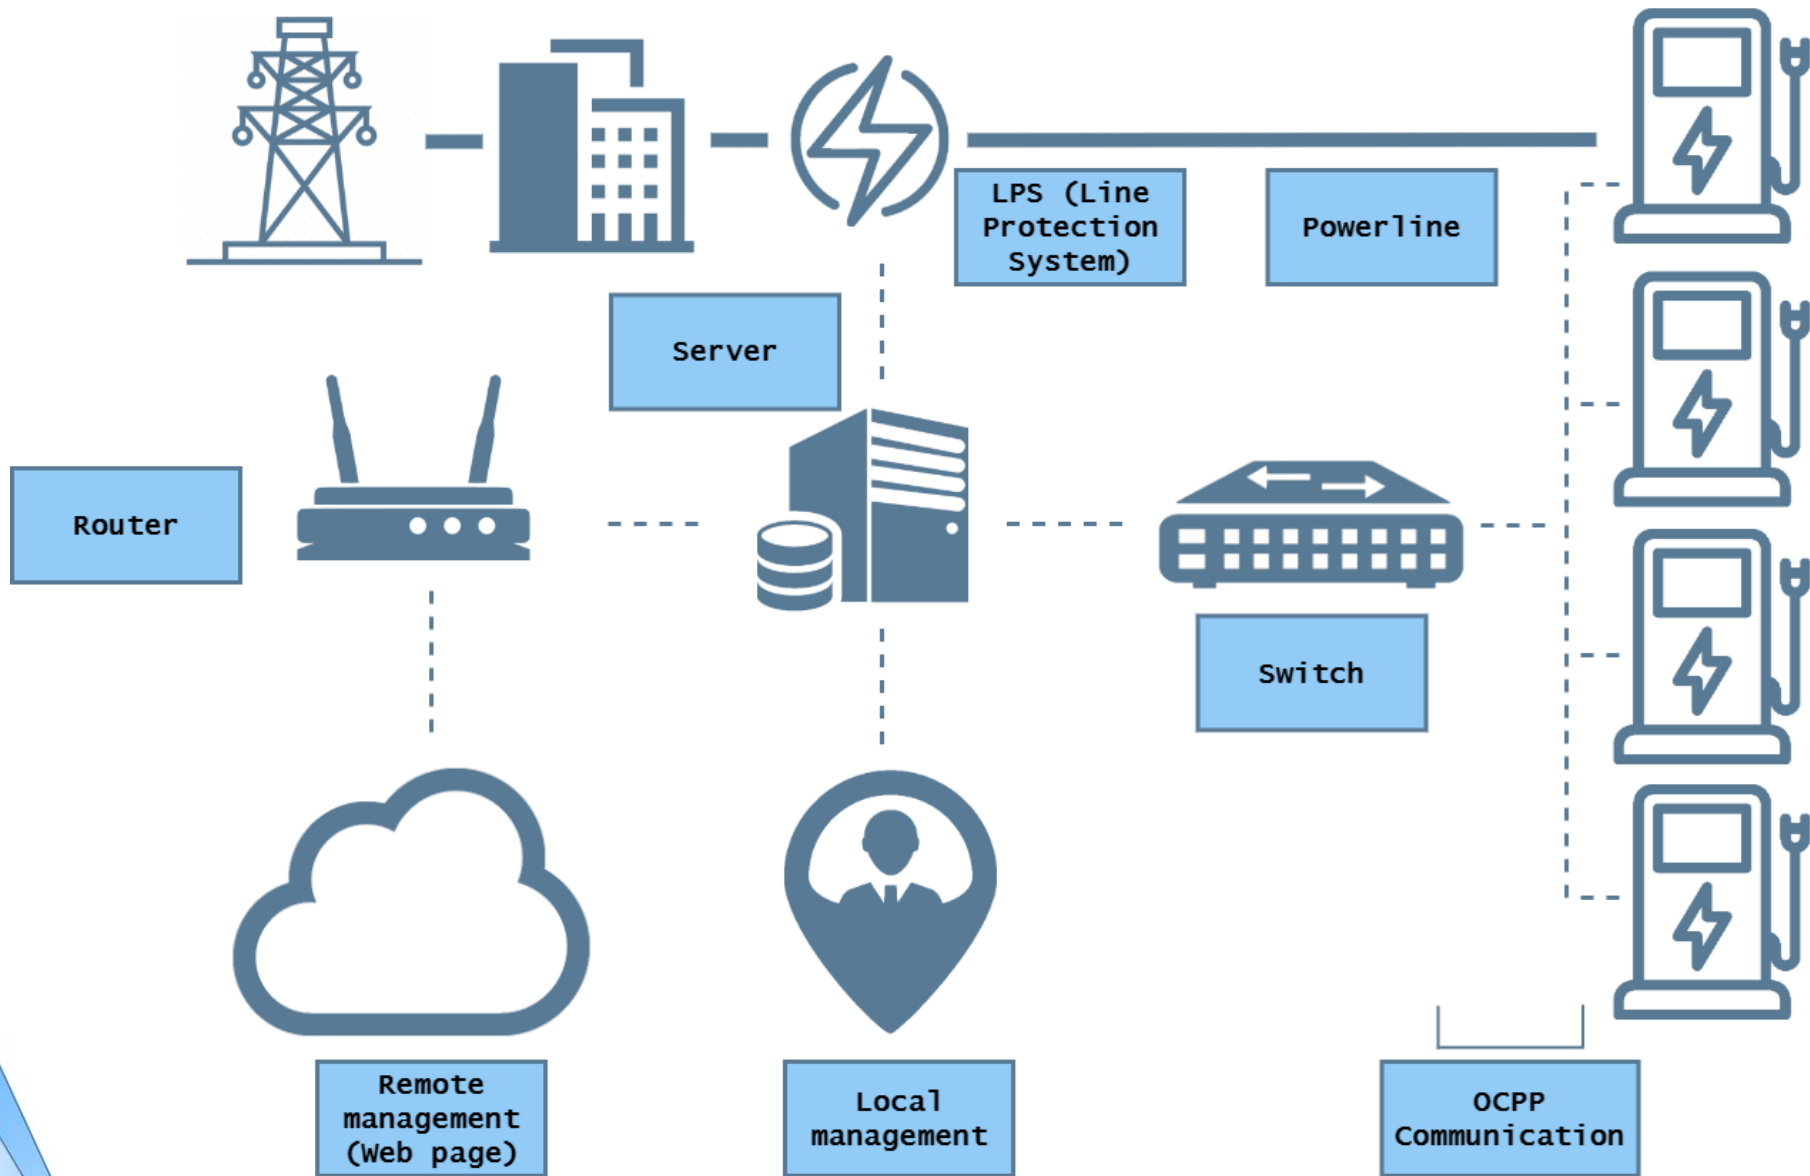

Scheduled reserve of chargers

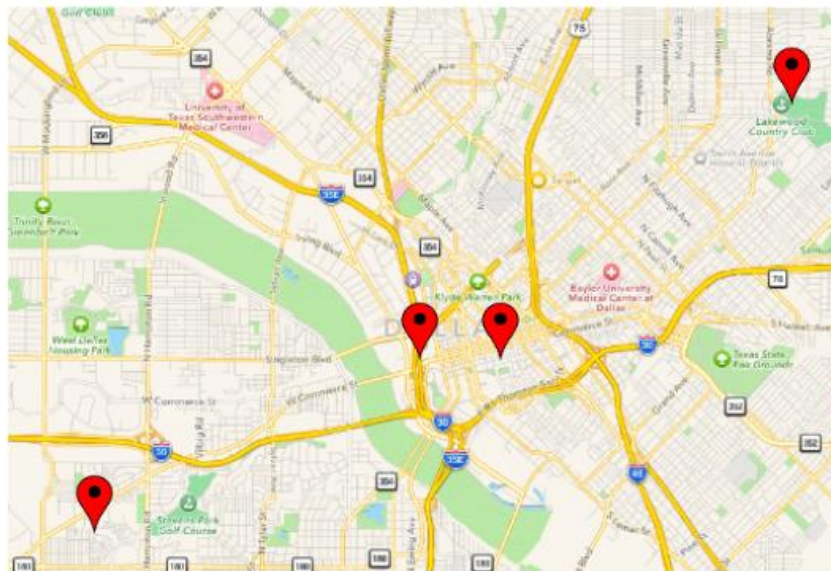

Management and monitorization of charging intakes of every recharging point

Remote update of the chargers firmware

OCCP BENEFITS

- Autonomous offline operation
 - Recharge transactions synchronization
 - EV charger monitoring
 - Authorization users
 - Meter Values
-
- EV chargers reservation
 - Remote Start/Stop
 - Remote firmware
 - EV chargers diagnostics
 - EV chargers reboot

SMART CHARGING FROM BACK OFFICE
